

Bovine Type II Cartilage Collagen Peptide

A low-molecular-weight hydrolyzed bovine cartilage collagen peptide for joint-health formulations and powder applications.

IDENTITY BOUNDARY
This product is hydrolyzed collagen peptide. It is not native, undenatured, non-denatured or UC-II(R) collagen.

CURRENT REFERENCE PROFILE

Review item	Current reference
Product identity	Hydrolyzed bovine cartilage collagen peptide
Source	Bovine cartilage
Average molecular weight	<= 2,000 Da
Protein	>= 90%
Reference packing	20 kg / bag
Reference shelf life	24 months under the stated storage conditions

DOCUMENT PATH

Product specification, batch COA, MSDS and available source- or facility-level quality information can be reviewed after the target specification, destination market and document purpose are clear.

SEND THESE DETAILS FOR A USEFUL REVIEW

- Intended formulation role and dosage form
- Target molecular-weight and protein requirements
- Animal-origin, traceability and destination-market needs
- Trial quantity, forecast demand, destination and timing
